Agriculture

High Quality Custom Engineered Bi-fold Doors

Protect your assets and your budget with the industries **BEST VALUE** bi-fold door

From livestock barns, to heated machine shops, to cold storage buildings, Diamond Bi-fold Doors are the logical door choice for your farm building. With decades of proven industry experience, farmers have come to trust the quality and reliability of Diamond Doors. Since 1998 Diamond Doors has specialized exclusively in the design and fabrication of the industry's best bi-fold door. This dedication and experience has made Diamond Doors the preferred choice for livestock barns, heated machine shops, cold storage buildings, and many other agricultural building applications.

So whether you're wanting to better secure your valuable equipment, looking to replace a worn-out sliding door, or better utilize an existing building, look to Diamond Doors for your door solution.

Cost Effective

A Diamond Door will save you time and money year after year with its low maintenance and ease of use.

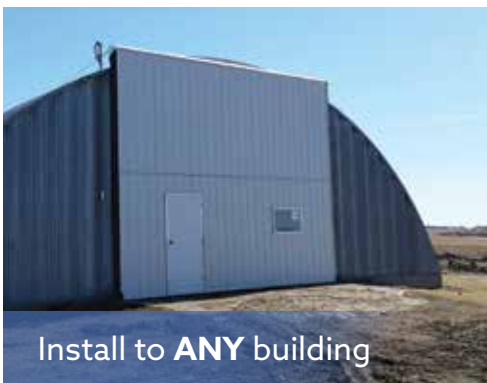

Durability

Utilizing quality components, a high strength steel frame and a drive design with minimal moving parts, a Diamond Door withstands the continuing demands of your operation!

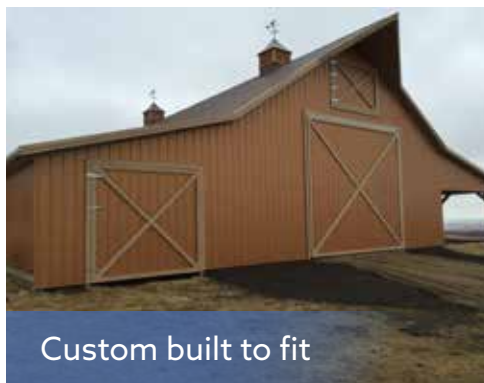

Simple Installation

Every Diamond Door arrives painted and fully assembled, with the electric opener factory installed and tested minimizing on site installation time.

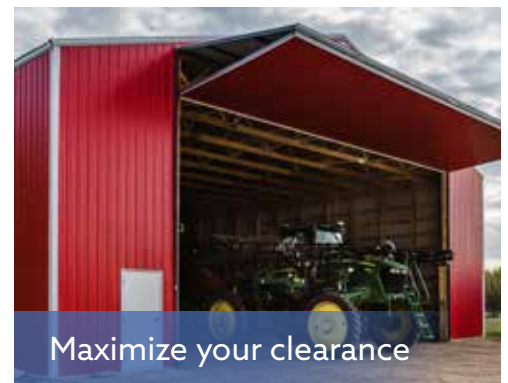

Install to **ANY** building

From steel quonsets to fabric structures, our steel header and support columns are a viable option to maximize your clear opening and to provide the necessary support.

Custom built to fit

Don't settle for less! Diamond Doors are custom built allowing you to maximize the possibilities of your building. Don't make your building fit the door, let the door fit your building!

Maximize your clearance

Stop losing head room with other door systems. With a Diamond door you can achieve full ceiling height clearance!
