To submit your order, drop this form at our office or email it to Office@SouthCountryDoors.ca

***Disclaimer: By measuring the spring yourself, you assume all responsibility and costs associated with spring(s) ordered based on the information provided on this form.**

How to Measure:

- **Total Length:** Measure both pieces of the broken spring and combine their total length.
- **Shaft:** Measure total diameter of shaft.
- **Inside Diameter:** Measure the inside of the spring from one point to directly across.

- **Length of 20 Coils:** Pick a coil to start at and mark it, this is coil #1. Measure the total length starting from the outside edge of coil 1 to outside edge of coil 20.
